### Barbarie growth curve

**La MESANGERE advises you:**

- 1- to allow for a density of 6 ducks/ m<sup>2</sup> in the building.
- 2- to have an separate area both for starting off and for raising stock.
- 3- to allow for a minimum of 5 m<sup>2</sup> range for each duck.
- 4- to have a gap of 2 weeks for cleaning up and sterilisation between each batch.
